---

### Technical Skills

**Front End:** HTML, CSS, Javascript, React, TailwindCSS

**Back End:** Node.JS, Express, Redux, Axios, MongoDB

---

### Projects

#### Google Clone / Junior Developer

This application has the ability to search for up-to-date results, news, images and videos. It also features a modern UI and dark mode. The Front End is built with React components while the styling is done with TailwindCSS. The data used to populate the components are fetched by using the Google Search API from RapidAPI.

#### Crypto Dashboard/ Junior Developer

This application has the ability to display information regarding the Price, Market Cap and Daily Percentage Change for the most popular cryptocurrencies. The Front End is built with React along with Ant Design to generate the UI. Charts are displayed by using Charts.JS. The data used to populate this app is generated by using the Coin Ranking API from RapidAPI.

#### Alan Artificial Intelligence / Junior Developer

This application generates the latest news articles based on a search query that was made by voice command. The Front End has been created with React and Material-UI. The speech recognition capability is handled by Alan AI. The data used to populate this app is generated by the Bing News Search API from RapidAPI.

#### MERN Memories/ Junior Developer

This application allows users to log in via Email or Google and then to create, edit, like or remove posts from their catalogue. The Front End was done with React and Material-UI. The Back End was built with Node.JS, Express, Axios and MongoDB. The app relies on using Redux and Reducers to handle state management, aided by Thunk to manage the middleware.

---

## **Experience**

### **Geek Stop / E-Commerce Manager**

July 2021 - PRESENT, CAPE TOWN

Responsible for the setup and day to day management of the Geek Stop e-commerce store, on the Shopify platform. From design editing to product uploads, customer relations, stock procurement from national distributors and shipment dispatching to customers.

## **About**

I am passionate about learning the latest technologies available to developers in both a Front End or Back End capacity. I enjoy creating applications that are well designed and responsive, in addition to being user friendly. I thrive in fast paced environments. Together with a diverse educational and work experience background, I excel at collaborating with teams both local and international. I consider myself to be adaptable, a self motivated learner and to always be looking forward to the next challenge.
